Target population: Initially, the Medicaid mental health consumers, receiving services through the Behavioral Health Organizations, under HCP & F oversight. (Upon successful completion of a pilot program the System may be generalized to all Colorado Medicaid services where initial market research indicates an over-funding of 13-15%.)

Approach: In response to the November 2006 HCP & F Performance Audit (Ch. 1, pages 17-30) which indicates a lack of Utilization Review for fiscal (i.e. performance based standards) and Quality control – Enigami Systems, Inc will provide data for both services. Utilizing a patented telephonic interactive voice response system consumer data will be obtained and represented on a secure web site to track treatment progress (for the provider and consumer), set quality standards (for HCP & F), and establish a provider/facility rating system (for consumers, providers, facility's, and HCP & F), all in support of a comprehensive Utilization Review system.

Enigami Systems, Inc. is interested in speaking to potential project partners.
